## MEP<sub>1</sub>

Reference No: 2013/09/07

Non heat sealable, one side treated, metallized BOPP film.

## **Properties**

- One side aluminium coated by vacuum metalization with excellent adhesion
- · Low permeability to gases, moisture and light
- Good dimensional stability under varying atmospheric conditions
- Excellent gloss

## **Applications**

Especially designed for decoration purposes, flower and gift wrapping.

HEAT SHRINKAGE	130℃ / 7 mln	MD	%	≤ 5.0		
		TD		≤ 3.0		

<sup>\*</sup>B/B : Nontreated side to nontreated side

Since the climatic and storage conditions influence the metallised surface treatment, the dyne level can not be guaranteed.

In-line corona treatment is recommended for lamination. An adequate primer on the metallized surface is suggested for printing.

The above information is the result of laboratory test which are applied on samples from standart production. Since the varying conditions under which our products used are beyond our control, all of the above results are without guarantee and warranty.
